

Natural World Quantum Harmonic Water System

A new advanced, revolutionary water system that improves water, food and more!

Why is it better for you?

It is the most state-of-the-art product in the world. It produces the **Quantum Harmonic Oscillator (QHO)** effect through a unique **SEH® Super Energy Control System** which when combined with other scientific technologies, results in our treated water with a substantial anti-oxidation capability.

The very prestigious lab, Toray Research Center in Japan, ran experiments and proved that Natural World Quantum Harmonic Water System not only removed harmful contaminants and heavy metals, but it was also proven that the treated water measured only 51 Hz, which is the tiniest possible cluster of water molecules. This is characterized with a high oxygen content which enhances regular water with higher levels of anti-oxidation properties. These tiny molecule also helps to remove pesticide residues in foods, plants and other contaminants and pollutants in water. **The treated water improves and maintains the freshness of food which other conventional Water System systems are unable to achieve. Our product is the only one, which possesses this unique function in the world.**

Switch to a healthier lifestyle!
Use **Natural World Quantum Harmonic Water System** to get the healthiest and safest benefits.

Three simple experiments – amazing results! Compare water from Natural World Quantum Harmonic Water System versus a variety of water from other sources, eg water from other filter systems, ionized water etc.

- 1** Brew any kind of tea or coffee using our treated water and after 30 minutes, or even overnight, you can still taste the freshness of the tea or coffee, because it will not taste bitter due to oxidation.
- 2** Pour a glass of “inexpensive” whisky, brandy, sake, soy sauce etc and place it in a bath of our treated water for 30 minutes. The taste becomes very smooth because the QHO properties from the Natural World Quantum Harmonic Water System is able to “penetrate” glass and minimize any impure substances.
- 3** Soak some fresh prawns in two lots of water, one lot in normal tap water and the other in our treated water. Freeze the two for up to a month then defrost and compare. Prawns in our treated water still smells fresh and when cooked will taste as sweet as the day it was bought; the other lot frozen in tap water will have a fishy smell and not taste as fresh.

Amazing results of using Natural World Quantum Harmonic Water System:

- High levels of anti-oxidation properties
- Retains only the good healthy nutrients in your food
- Removes harmful contaminants and other particles
- Improves the freshness and taste of food
- Gets rid of residual chlorine from tap water
- Vegetables, fruit, meats or seafood stay fresh and nutritious longer
- Higher oxygen content in the water
- Creates healthier tiny clusters of water molecules, which are easier to be absorbed through our body, plants, food etc.

Natural World Quantum Harmonic Water System

has many unique features that are ready for various applications. It can highly improve our quality of life in many ways:

At Home

Your home simply cannot do without it – your food will taste better and is more nutritious.

- Keep your food fresh and nutritious. Air pollution is getting uglier day after day, the pollutants in the air (e.g. dioxins) are everywhere. Just soak vegetables, fruit, meats or seafood in the water treated from Natural World Quantum Harmonic Water System for approximately 15~30 minutes will help them stay fresh, more nutritious and last longer;
- Removes residues from agricultural chemicals, contaminants, and heavy metals from your food by simply soaking it in the treated water for approximately 15~30 minutes;
- Even the colours of packaged food will last longer which not only enhances the flavor, but also improves its nutritional values.
- Improves the quality and taste of your drinks such as tea, coffee, and alcohol. Also, when combined with soy sauce the enhanced taste reduces the amount of soy sauce you need to use for cooking, thereby limiting the amount of salt, which is good for health.
- Make delicious rice, noodles and soups by using water from Natural World Quantum Harmonic Water System – this helps get rid of chlorine from tap water as well as other harmful contaminants, keeping in only the good nutrients.
- Hair dyes and perms. Rinsing just-permed hair with water from Natural World Quantum Harmonic Water System removes the chemical odor from the dye and/or perm products while protecting your scalp.
- Add water from Natural World Quantum Harmonic Water System to your home tropical aquarium - the fish will become healthier and more energetic and the tank stays cleaner.

According to CtiTV News, the research of Dr. Lin, Pi-Shia of National Taiwan University, showed that the organic vegetables are often given too much nitrogen-based fertilizers in order to increase the production yield. Therefore, some of the organic vegetables produced this way are usually found with excessive nitrates (about 5,000ppm). (Soaking the organic vegetables in water from Natural World Quantum Harmonic Water System can remove the excessive nitrates.)

Better Business

Using Natural World Quantum Harmonic Water System is simply good for business – stay one step ahead of your competitor.

- Provides for better quality of food and longer-lasting freshness
- For food processing businesses, the use of Natural World Quantum Harmonic Water System provides for better quality of food with longer-lasting freshness.
- Hotpot restaurants, cafes and other dining outlets will offer better tasting food and beverages (as compared to food preparation and cooking using normal tap water).
- Hotpot restaurants, cafes and other dining outlets will offer better tasting food and beverages due to the strong anti-oxidation properties and higher oxygen levels in water. (as compared to food preparation and cooking using normal tap water).
- For hair salons, rinsing your clients just-permed or coloured hair with the treated water not only lessens the chemical odor from the perm or dye products but will also help to protect their scalp.

Improved Industrial (food related) and Agricultural uses.

Extend the freshness and improve the value of food ingredients as well as having many applications in the agricultural industry

- Using Natural World Quantum Harmonic Water System for producing bottled drinks is unique because the drinks cannot be easily oxidized, keeping the product fresh.
- Enhances the quality of your product making it more competitive in the market.
- Production yields and quality for growing mushrooms and for irrigating vegetables, fruit and flowers are higher, translating to better profits.
- Crops will grow to become stronger, after only soaking the seeds for 30 minute before planting them.
- In farming, feeding your livestock (chickens, ducks, pigs etc.) with the treated water will help to increase their immunity to diseases. It also helps to reduce the odour of their excrement.
- Helps chickens produce fresher eggs.
